

StorPlus™ | EZ Access™ Lids

Convenience. Safety. Secured.

Carlisle's EZ Access Lids were designed in collaboration with the people who use our products everyday. We didn't aim to add just *any* hinged lid to our line of food pans. We aimed to design **the best** hinged lid, listening to real foodservice operators, and solving simple problems that had been caused by years of neglect from other manufacturers.

Other Lid

EZ Access Lids

**50% – 60%
Larger Opening**

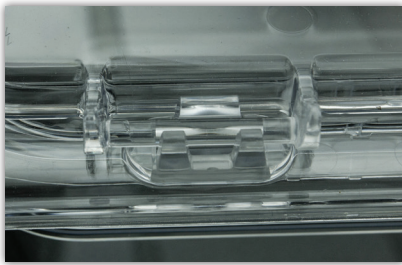

Improved Accessibility

Accessibility is crucial when it comes to consistency and efficiency. Our lids offer a 50%-60% larger opening, ensuring employees' hands aren't constantly scraping against sidewalls and food pan contents can be reached using utensils quickly and easily, no matter the size of the utensil.

FOODSERVICE PRODUCTS

OUR LIDS DON'T POP OFF

Snug Fit

Our lids fit snugly onto your food pans, ensuring they do not pop off when leveling a measure miser on the sidewall for proper portioning.

Convenient Details

Carlisle's new design includes lipped notches that allow employees to open the lid with a simple flick of the wrist or measure miser. EZ Access Lids also available with either one or two notches*, allowing measure misers to be used in support of varying portion control needs.

Increased Capacity

Improving on our competitors' "sunken" designs, we ensured that your food pans hold their full, specified capacities. EZ Access Lids feature a raised design that does not impede on the maximum fill levels of your pans.

Easy Cleaning

EZ Access Lids were designed to be easily cleanable, eliminating dangerous food traps found on other hinged lid designs.

Unmatched Durability

With an integrated double-hinged design you can be sure that your EZ Access Lids will handle the abuse of the most demanding foodservice applications. When not in use, simply hang your lids using the convenient molded-in peg hole.
