WHO ARE WE

Bormioli Rocco's first glassworks date back to 1825, but historians say the first traces of Bormioli Rocco glasswork masters are appearing back in the Middle Ages.

Today, through investments over the years, Bormioli Rocco is no longer a single company, but a group of companies and multinational production units.

Present in Europe and the United States, Bormioli Rocco continues to expand as a brand leader in the Home and Restaurant market, as well as being a company known in glass containers business for perfumery, pharmaceutical and food.

WHO ARE WE

The history of Anchor Hocking is a story of a company that started small, but grew through initiative and desire on the part of its founders and employees. In the years that have passed since I. J. Collins founded the Hocking Glass Company in 1905 in Lancaster, Ohio, it has grown into the Anchor Hocking Company which now reaches worldwide.

The Anchor Hocking Glass Company was formed in 1937, when Anchor Cap and Closure Corporation and Hocking Glass Company merged. Today, Anchor Hocking's state-of-the-art facility is one of the largest pressed glass plants in the United States. Anchor Hocking continues to grow strength in the Foodservice Industry offering a wide variety of drinkware, tabletop products and stemware. Other channels of distribution include Mass Merchants, Discount Stores, Department Stores, Supermarkets, Drug Stores, Specialty Stores, Military, Hardware, Direct Sell and Mail Order catalogs.

For more information visit: www.anchorhocking.com

Stemware

A variety of stemware sizes and styles that add to the enjoyment of everything from fun, specialty cocktails to fine wines.

Suggestions for handling glassware for profitability and safety.

Sugerencias para el manejo provechoso y seguro de la cristalería.

- ① Have adequate backup supply of glass for rush periods to avoid thermal shock. Never place recently washed glasses into service. Let glass stand long enough to reach room temperature.

Tenga siempre a mano, deje que reposen suficientemente para enfriar a la temperatura ambiental.

- ② Sort all items in bus tray.
- Acomode todos los artículos en la bandeja de platos sucios.*

- ③ Always use scoop - Never scoop ice with glass.
- Use siempre cuchara para hielo - no saque hielo con un vaso.*

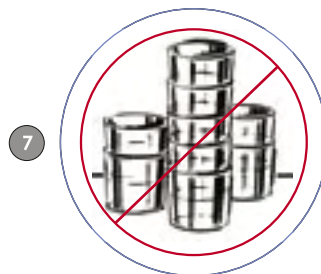

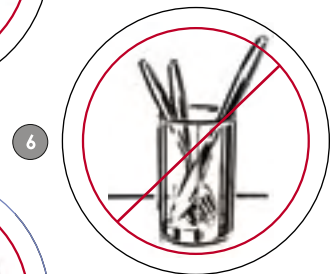

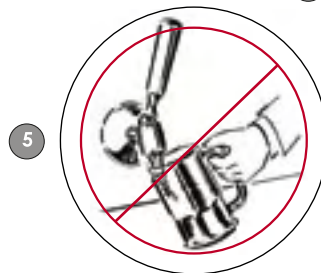

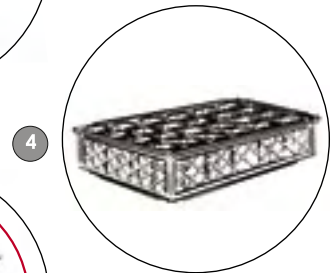

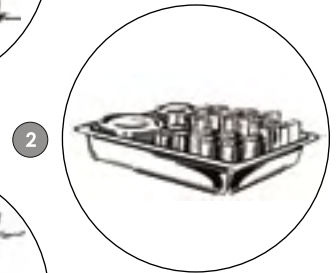

- ④ Use correct racks for stems and tumblers.
- Use canastos adecuados para vasos y para copas.*

- ⑤ Avoid glass contact with beer tap.
- Evita el contacto del vidrio con el grifo de la cerveza.*

- ⑥ Never put silverware into glass.
- Nunca ponga cubiertos dentro de los vasos.*

- ⑦ Never stack glasses.
- Nunca apile vasos.*

- ⑧ Never pick up glasses in bouquets.
- Nunca levante los vasos de manojo.*

GLASS RACK SIZING GUIDE

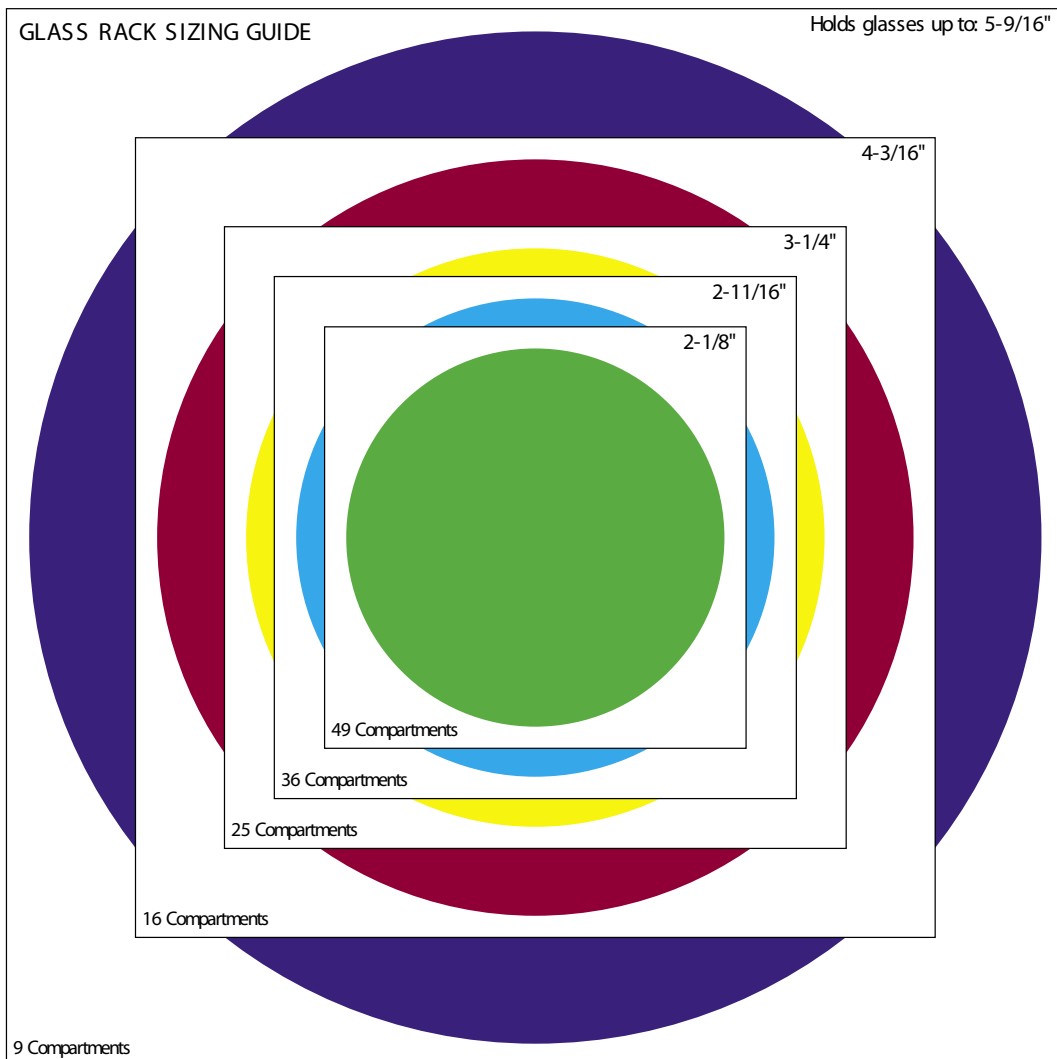

FOR USE WITH OPTICLEAN GLASS RACKS.

INSTRUCTIONS:

1. Place glass upside down on top of the middle circle of the sizing guide; center of the glass (or the stem on stemware) should be over the center of the guide
2. Look down on the base of the glass
3. Note the smallest square on the guide where the largest outside diameter of your glass lines up completely within the square without touching it — this is the number of compartments your rack needs to have
4. Place lip of glass against the base line of the vertical guide on the left-hand side of the page with the base/foot of the glass pointing straight up towards the top of the page
5. While holding the glass against the vertical guide, note where the base/foot of the glass lines up on the vertical guide — the next line above the base/foot on the guide indicates the number of extenders your rack will require
6. Carlisle's unique OptiClean W arewashing rack system allows you to build the perfect rack for any application. Glasses with a maximum height exceeding 10-1/2" will need more than five extenders. Custom racks requiring more than five extenders are available for order by contacting a Carlisle FoodService Products customer service representative. Each extender adds approximately 1-1/2" of additional height to the inside compartment of the rack.

For glasses with a maximum diameter exceeding 6", Carlisle FoodService Products recommends using the RTP peg rack. The RTP peg rack can be custom ordered to accommodate any glass height.

Please contact a Carlisle FoodService Products customer service representative to place your order, or for more information about building the ideal rack for your needs.

Our Promise to you . . .

Added strength, durability and lower replacement costs are important to all of us in the Foodservice marketplace. That's why Anchor Hocking Fully-Tempers, Rim-Tempers, Pure Finishes and Sure Guard™ Guarantees many of our products.

Tempering is a process of heating and cooling the entire piece of glass during the manufacturing process. Fully-Tempered products are two to three times stronger than ordinary annealed glass products. What does that mean for you? Longer life and lower replacement cost!

A variety of our products are Rim-Tempered (sometimes referred to as heat-treated). This process is similar to Fully-Tempered, except that the heat is concentrated on the rim area, followed by the cooling process, allowing for a stronger more durable product.

Pure Finish R.S. (Rim Strengthened) denotes glassware without a bead on the rim that has been cracked off and fire polished to yield a smooth yet durable rim. The Pure Finish to the rim provides an unadulterated drinking experience while providing the strength that is needed in foodservice.

To assist you we've coded the Fully-Tempered, Rim-Tempered, Pure Finish R.S., and Sure Guard™ Guarantee in our catalog. You'll see Fully-Tempered products noted with a (★), Rim-Tempered with a (☆), Pure Finish R.S. with a (▼) and Sure Guard™ Guarantee with a (◆).

SURE GUARD™ Guarantee

Sure Guard™ is the foodservice industry's most extensive glassware guarantee. Anchor Hocking guarantees its entire foodservice line against chipping. If the rim of a tumbler or the foot or rim of a piece of stemware chips in normal use, Anchor Hocking will replace the item or refund the purchase price when returned to the dealer or distributor from whom it was purchased. Products in the foodservice line are defined as all active products in the foodservice price list. Naturally, this guarantee does not cover breakage.

Reference Information:

The description with the illustration of each item includes:

Item number, Capacity or Size and Dimensions.

Dimensions, Capacities & Codes

The dimension under each item are stated to the nearest 1/8".

H = Height

T = Top Diameter

B = Bottom Diameter

D = Overall Maximum Diameter

Approximate liquid capacities are stated in ounces.

Service Setting

An adequate inventory of glassware in a foodservice operation or bar will help decrease breakage, because if supplies are short, workers must handle glasses faster and less carefully. These charts offer not hard-and-fast rules, but only suggested requirements.

Custom Capabilities

In addition to our expansive foodservice product line, Anchor Hocking offers a full range of value-added solutions to meet your individual needs. Choose from customized products that are unique to your company or special packaging that can help build your brand name. Our goal is to provide not only quality glassware to our customers, but quality solutions.

Silk Screen Decorating

Promote your company logo through a durable silk-screen decoration. Available in one to eight colors.

Product Modifications

Create new, unique items built around your company name or logo.

Unique Decorating

Add color to any existing glassware item to create a bold impression.

Custom Packaging

Develop unique cartons to fit your specific pack, material, and label requirements.
