

CHARBROILER / RADIANT CONVERSION

GUIDELINES TO CONVERSION / WARRANTY

In the past Star Mfg., has stated that these conversions could not be done. We are changing our stance on this and with that warranty for units vs. parts must be outlined. See the below list for guidelines.

If a new unit that a dealer is selling needs to be converted:

- Parts must be purchased by dealer at their standard parts discount.
- All items required to be purchased will have the standard 90-day parts warranty time frame. All required parts by brand / model are indicated on the following pages.
- Conversions are not covered under warranty and are Not to be done by ASA. This is a manual process that will not require a technician.

If an existing unit in the field is being converted because of customer request:

- Parts must be purchased via an ASA or via our parts partner Parts Town.
- All items required to be purchased will have the standard 90-day parts warranty time frame. All required parts by brand / model are indicated on the following pages.
- Conversions are not covered under warranty and are Not to be done by ASA. This is a manual process that will not require a technician.

Converting an Ultra-Max Radiant Charbroiler to a Lava Rock Charbroiler
