Rust and Corrosion Free

Backed by a lifetime warranty against rust and corrosion, Camshelving storage systems eliminate the inconvenience and costs associated with restoring or replacing degraded shelving. Only Cambro offers Shelving for Life®.

Multi Environment Use

From freezers to coolers, ware washing or dry storage, Camshelving is designed to withstand all storage applications and temperatures—impervious to moisture, chemicals, salt, food acids, and humidity.

Easy to Clean

Cleaning shelving shouldn't be a major production. Whether daily or scheduled, cleaning can be done quickly and easily without interrupting storage space or normal, day-to-day operations.

Easy to Adjust & Assemble

Each shelf can be easily and independently adjusted to accommodate a variety of storage products and packages as product and storage needs change. Units ship in one box with pre-assembled post frames.

Maximized Space Utilization

Components have been thoughtfully designed to maximize storage space, even in space-restricted areas. Position shelves anywhere along the post, with dovetails spaced 4" apart.

Maximize storage capacity by creating storage aisles in all available space. This simple system is composed of stationary starter units anchored to a raised floor track system at both ends with high density mobile units installed in between. Easy to install track requires no drilling or gluing.

Increases Storage Capacity Up To

50%

High Density Mobile Units ship complete in 1 box and include factory assembled post kits, vented or solid shelves and high density casters and donut bumpers. Full track and extension kits ship complete with required hardware.

Stationary Starter Units are required to anchor the system at both ends (see Premium Series Stationary Starter Unit spec pages). The Ultimate #10 Can Rack Unit may also be installed on either end, offering high capacity can storage in a compact space.

Active aisle of 30"–36" provides easy access to all stored product.

Stationary Unit*

High Density Mobile Units

Stationary Unit

Raised Floor Track provides a smooth and level surface to easily roll mobile units. Raised track ensures dirt will not get trapped and is easy to clean. Aluminum track and stainless steel hardware are rust resistant.

*It is recommended to use a stationary unit for every 15' of track to further stabilize the system.

Grooved casters roll easily and securely on raised track.

Raised track connects easily to the bottom of a stationary unit that works as a system anchor. No bolts, no glue or drilling into the floor are required. Easy and fast set up.

High Density Full Track and Track Extension Kits

Each kit ships complete in 1 box with aluminum raised track rails and stainless steel hardware required to complete installation.

CAMSHELVING ELEMENTS® series

STATIONARY | MOBILE | UNDERCOUNTER

WHY CHOOSE ELEMENTS?

Made from a revolutionary, extremely strong composite material with a smooth, easy to clean surface. Elements Series is stronger than common wire shelving. It's lighter in weight than Camshelving Premium Series and totally impervious to moisture, chemicals and liquids that can destroy shelving over time. Elements Series is designed for medium to heavy storage use in freezers, coolers, dry storage or warewashing areas. It easily supports the performance demands of a busy foodservice operation.

BASICS® PLUS

series

STATIONARY

WHY CHOOSE BASICS PLUS?

Just because the budget is tight and storage needs are less rigorous, it doesn't mean that shelving performance and storage efficiencies should be compromised. Basics Plus Series is made from the same high performing, strong composite material as Elements Series and has the same design features. It's lighter in weight and less in cost but still strong enough to handle light to medium storage demands.

COMPONENT

Post Connectors, Corner Connectors, Floor Fastener, Wall Fastener, Shelf Rails, Single Shelf Security Cage, Shelf Divider Panels and Identification Tags are not NSF listed.
