STANDARD CONSTRUCTION SPECIFICATIONS

Shall be a Crown model DC-6, DC-10, DC-12 or DC-20, direct connected, steam, counter top tilting kettle.

A double wall kettle interior shall form a steam jacket around the lower 2/3 of the kettle.

The bottom of the kettle shall be of hemispheric design for superior heat transfer.

The tubular stainless steel mounting legs shall have the tilt bearings, steam supply and condensate return pipes completely concealed within the leg members and the right leg will be fitted with a steam control valve.

A single support leg with nylon foot shall support the kettle in the upright position.

The sealed stainless steel tilt mechanism bearings shall permit the kettle to tilt forward past 90° for complete emptying.

A removable operating handle with heat-proof knob shall be mounted on the left or right.

Construction shall be all welded satin finish stainless steel, type 304.

Standard features include type 316 stainless steel liner for use with high acid content products.

The kettle shall be NSF Certified,

ASME code stamped and National Board registered.
