STANDARD CONSTRUCTION SPECIFICATIONS

Shall be a Crown model GS-30 or GS-40, gas fired skillet with manual tilt, AGA/CGA and NSF Certified.

The unit shall have a stainless steel cover with spring assist hinges, full width handle, no-drip condensate guide and vent port with swing cover.

The pan shall have a sloped front and front hinged for easy tilting pour control and comes complete with a removable pour strainer and etched gallon markings.

Pan is formed from 10 gauge type 304 stainless steel with a #4 finish exterior and polished interior with coved corners for ease of cleaning.

Cooking surface shall be of 3/4" triple-ply construction with 3/8" thick aluminum core ensuring even heat distribution over entire cooking surface.

The pan shall be heated with stainless steel atmospheric burners

with intermittent pilot ignition.

The pan shall be mounted on a heavy duty welded frame with stainless steel exterior supported by an all welded 1-5/8" (41mm) stainless steel pipe frame with adjustable bullet feet and rear legs fitted with flange adjustable feet for securing to the floor.

Unit shall have a permanently lubricated, self-contained gear box tilt mechanism to allow the pan to tilt forward for complete emptying of contents.

The controls enclosure shall be designed to meet NEMA-2 and shall provide a degree of protection against dripping and light splashing water and shall include a solid state thermostat with OFF position and a range of 100-450°F (38-232°C), a thermostat indicator light, an ignition indicator light, pan tilt switch that shuts burners off if tilted more than 5°, and high temperature cut-off set at 500°F(260°C).
