	 DANGER
	<p>Machine must be properly grounded to prevent electrical shock to personnel. Failure to do so could result in serious injury, or death. DO NOT immerse any part of this equipment in water. DO NOT use excessive water when cleaning. Keep cord and plug off the ground and away from moisture. Always unplug the equipment before cleaning or servicing. A certified electrician must furnish sufficient power for proper machine operation and install any supplied receptacle (reference unit Data Plate for model specific Volts AC, Hertz, and Wattage requirements). We recommend this equipment be on a dedicated and protected circuit. Failure to wire properly will void the warranty and may result in damage to the machine. It is Gold Medal Products Co.'s recommendation that this machine be plugged directly into a wall outlet. The use of extension cords is not recommended due to safety concerns, and may cause sacrificed and/or reduced performance. Make sure cord is located to prevent a trip hazard or unit upset.

Before You Plug In Machine

1. Make sure all machine switches are OFF before plugging equipment into receptacle.
2. Make sure wall outlet can accept the grounded plugs (where applicable) on the power supply cord.
3. The wall outlet must have the proper polarity. If in doubt, have a competent electrician inspect the outlet and correct if necessary.
4. **DO NOT** use a grounded to un-grounded receptacle adapter (where applicable).
5. Install unit in a level position.

	 CAUTION
	<p>If the supply cord is damaged, it must be replaced by a special cord or assembly available from Gold Medal Products Co. or its service agent.</p> <p style="text-align: right; font-size: small;">038_062714</p>

OPERATING INSTRUCTIONS

Controls and Their Functions

POWER SWITCH

ON/OFF lighted rocker switch - supplies power to the heating element.

Operating Instructions

Each pan can hold 3 bags containing 8 buns each (buns left in bag – recommended method) or each pan can hold 28 buns (un-bagged).

Buns in a sealed bag (recommended method):

Water should not be used with buns in a sealed bag as the bag will hold in the moisture from the buns.

1. Place sealed buns in drawer pan with insert rack, close drawer, and turn the Power Switch ON.

Buns un-bagged:

1. Pour 1/2 cup of water in the bottom of the removable drawer pan to provide some steam for un-bagged buns.

Note: 1/2 cup of water should keep buns in good, moist condition for 4+ hours. If excessive water is used, buns near the water can get overly soggy and excessive condensation will collect on the “ceiling” inside the cabinet.

2. Place insert rack in pan, then place hot dog buns in the drawer pan, and close drawer.
3. Periodically check to see if water needs to be added. If the unit runs out of water, the buns may become hard and dried out.

Good sanitation practice demands that all food preparation equipment be cleaned regularly (only use non-toxic, food grade cleaners). A clean looking, well-kept machine is one of the best ways of advertising your product.

Follow the directions below to clean and sanitize unit each day after use.

1. Turn machine OFF, unplug unit and allow it to cool before attempting to clean.
2. Do not leave water in unit when not in use. Lift the drawer pan and insert rack out of the drawer and take them to the sink to clean.

To remove drawer and wipe out inside of cabinet (as needed): Locate the release lever on each side of the drawer as shown below.

3. Clean unit with a soft cloth, dampened with soap and hot water.
4. Wipe stainless steel parts with a clean cloth and cleaner designed for stainless steel, such as Gold Medal Watchdog Stainless Cleaner (Item No. 2088).

DO NOT use oven cleaners or abrasive materials as they will damage parts of machine.

To Remove Drawer:

1. **Open drawer fully.**
2. **Push both release levers DOWN.**
3. **Pull drawer from unit.**
