

WAFFLE PLATE REPLACEMENT

PARTS:

- 2 waffle plates
- 4 large screws (2 extra)
- 16 small screws (6 extra)
- Screwdriver

INSTRUCTIONS:

1. Carefully unpack the replacement kit.
2. Using the provided screwdriver, carefully remove the screws from the perimeter edge of waffle plate/s. Lift plates up and off the housing. Slight force may be needed to release the plates completely. Discard the old plate/s and screws.
3. Starting with the lower grid, place the new plate onto the housing by aligning rear and front projections onto the base. The wider projections will fit into the rear.
4. Install 1 large screw into the slot located near the handle.
5. Install the smaller screws around the perimeter.
6. Repeat steps 2–5 for the upper grid replacement.
