Jackson NXP-HTD!

Warewashing Systems

NXP-HTD

The NXP-HTD is a basic, high temperature sanitizing dishmachine that comes with a great price point, so it's easy to step-up from a low temp to a high temp machine! We call it basic, but it's far from that! It is loaded with features like Sani-Sure™ final rinse system, delime cycle, vent fan control, hi-limit thermostat and low water protection, and more! It's super simple to operate, and provides first-rate results!
