**Machines with blue tinted glass are made with high impact poly-carbonate.

**Machines with clear glass are made with tempered glass.

*Sno Cone Machines will shave 500 lbs of cube or chunk ice per hour.

*It takes ½ lb of cube or chunk ice to make one 6 ounce Sno cone.

Sno-Cone Production

Ready to use gallon syrups are packed 4 in a box.

Ready to use quart syrups are packed 12 in a box.

One 6 ounce sno cone will take 2 ounces of syrup. The cone itself won't hold more than that.

When using the pumps, each push on the pump will disperse 1 ounce of syrup.

Each gallon of syrup contains 128 ounces.

Each gallon will yield 64 sno cones.

Each quart of syrup contains 32 ounces

Each quart will yield 16 sno cones.
