Rugged 40-Gallon All-Weather Trash Container

When equipping your business's exterior with waste receptacles, you want to be reassured it will last in the harshest weather conditions but is also aesthetically pleasing. With our Rugged 40-Gallon All-Weather Trash Container, you can be confident you're getting the most bang for your buck on a long-lasting product. Its weather-resistant powder-coated steel frame and lid will ensure its longevity while maintaining its quality. Additionally, its solid dome lid allows for rain to glide off easily and not pool, decreasing the likelihood of corrosion. The heavy-duty plastic interior bin will securely hold trash bags without the worry of leaks. Since your terrain isn't always guaranteed to be perfectly flat, we have outfitted our trash container with adjustable legs. They will help certify stability and support on uneven surfaces. Thanks to our substantially sized 40-gallon receptacle, maintenance is greatly reduced. It is also available with a stainless-steel ashtray, giving people a way to safely extinguish their butts before disposal. These trash receptacles are vital to keeping your facilities clean in conjunction with elevating your aesthetic. We understand that sometimes things happen, such as theft or vandalism; therefore, we've equipped each trash container with a lock and key to help protect your investment. Affixed to the interior of the trash container are two chain-link security chains that prevent your lid from falling when opened. It's a no-brainer to outfit your facilities with our superior trash container with all these fantastic features.

FEATURES

Protection: It is equipped with a lock that will prevent tampering or vandalism.

Outfitted: Each trash container has adjustable legs to ensure stability and support.

Low Maintenance: Our substantially sized 40-gallon receptacle will require less emptying.

Free Flowing: Its slotted bottom will allow rain and snow to pass through and not build up.

Options: You can have your trash can equipped with a stainless-steel ashtray that provides safety.

Included: With each purchase is a heavy-duty plastic bin that holds your trash while preventing leaks.

Affixed: In the interior of the trash receptacle are chain link security chains that will keep your lid from falling when opened.

Two chain link security chains.

Slotted bottom allows water to pass freely.

Adjustable Legs.
