

EUROPEAN STRAIGHT DISPLAY CASES NATURAL Refrigerant

Self-Cleaning Condenser Equipped Units

■ **Self-Cleaning Condenser (Patented)**

The accumulation of dust in the condenser can cause the failure or breakdown of refrigerators. Refrigerators run normally until they reach a certain level of accumulation. At some point, when they are over the limit, their performance drops quickly resulting in damage to, or disposal of the stored products inside. The Self-Cleaning Condenser device keeps the condenser clean and prevents system failure by automatically brushing daily.

■ **Hydrocarbon refrigerants (R-290)**

With innovative and eco-friendly technology, Turbo Air brings you hydrocarbon refrigerators designed to meet DOE's Energy Conservation Standards in 2017 and to use EPA's SNAP Program approved HC refrigerants. Hydrocarbon refrigerants do not deplete the ozone layer and have very low contribution to global warming (ODP-0, GWP-3).

■ **Attractive, elegant, glass sided Euro design**

Straight tempered front glass and minimal frame provide full product visibility to optimize display effects. Its elegant contemporary euro design and luxurious colored case will not only enhance any store atmosphere but also will keep product presentation at its best and most beautiful.

■ **High-density polyurethane insulation**

The entire cabinet structure is foamed-in-place using high density, CFC free polyurethane insulation.

■ **Low-E coated double pane glass is tempered for safety**

■ **Adjustable, tempered glass shelves with stainless steel front and back edges**

■ **Stainless steel floor and airflow grille**

■ **Sliding rear doors for product loading & unloading**

■ **Rear access to compressor compartment for quick and easy service**

■ **Stainless steel color option available**
