Walk-In Coolers & Freezers
With Self-Contained Refrigeration Systems

Equipped with YOUR CHOICE of SELF-CONTAINED

Capsule Pak™ refrigeration systems

CAPSULE PAK With R449A Refrigerant CAPSULE PAK ECO™ With R290 Refrigerant

OPTIONS

(Most options available two weeks from receipt of order. Please contact us for specific questions.)

- ☐ Heights: 8'7" with floor, 8'4" without floor
- ☐ U-shaped shelving system
- ☐ Floor tread plate kit
- ☐ Exterior ramp
- ☐ Door hood (outdoor models)
- ☐ Heater kit for outdoor use with medium temp applications where ambient conditions may go below 32°F
- ☐ Leak detector/alarm (may be a requirement in some areas)
- ☐ Electric vaporizer (indoor models only)
- ☐ Five year compressor warranty

FEATURES

- Cooler or freezer models
- Sizes from 4' x 6' to 10' x 14'
- Three heights: 6'7" & 7'7" with floor; 7'4" floorless
- Indoor or outdoor models
- Two temperatures: +37°F, -10°F
- Ceiling mount Capsule Pak refrigeration system (ordered separately)
- · Air-cooled condensing unit
- LogiTemp™ electronic controller system
- 26 gauge corrosion resistant stucco embossed coated steel on all surfaces except interior floor
- Smooth aluminum interior floor (on models with floor)
- Floorless models supplied with NSF listed vinyl sealers
- Full 4" thick panels foamed-in-place with EPA-compliant polyurethane insulation
- 26" wide, self-closing door
- Heavy duty adjustable cam-lift hinges
- · Spring actuated door closer
- Deadbolt locking handle with independent key/padlock feature and inside safety release
- Magnetic gasket
- Digital thermometer and light switch
- Floor double sweep gasket
- Perimeter door heater wire
- High output low profile LED light positioned above the door to prevent interference with shelving or product
- UL and C-UL listing on complete Capsule Pak and Capsule Pak ECO refrigeration systems*
- UL NCKL listed certifying compliant walk-ins are ignition protected
- NSF listed, UL flame spread 25 or less on all foam cores;
 UL electrical listing on door sections
- · City of Houston listed
- California State listed
- CN UL flame spread listed
- DOE compliant
- · Oregon State listed
- USDA accepted
- 15 year panel warranty
- 18 months parts & labor warranty
- INDOOR MODELS:
 - Hot gas condensate vaporizer
- OUTDOOR MODELS:
- White membrane roof and trim
- -- 20°F ambient controls

^{*} C-UL is Underwriters Laboratories Safety Certification Mark which indicates that UL has tested the equipment to applicable CSA Standards.

QS SERIES

WALK-IN COOLERS & FREEZERS WITH SELF-CONTAINED REFRIGERATION SYSTEMS

WALK-IN SPECIFICATIONS

QS Series walk-ins are built of modular panels and are insulated with foamed-in-place EPA-compliant polyurethane insulation. Each panel is designed to ensure ease of installation, long term reliability and high insulating efficiency.

- A. All panels are manufactured with male and female mating rails to ensure proper alignment during installation. The polyurethane insulation wraps around the return bend metal seams on both section to create a lightweight panel of exceptional strength and durability. All panels are a full four (4) inches thick and provide a superior insulating value.
- B. The foamed-in-place cam locking fasteners ensure an airtight seal for maximum energy efficiency.
- C. Panel gaskets located around the outer perimeter of the panel are continuous, without cuts or breaks at corners. Because gaskets are foamed-in-place as an integral part of the panel, they cannot fall off or pull off during shipment or installation.
- D. Panels lock together tightly for an energy efficient walk-in.

- E. Edge caps for ends of floor and ceiling panels are foamed-in-place rather than overlapped or mechanically fastened. Edge caps cannot come loose, and they stay in place through the life of the walk-in.
- F. Panel Finishes: Interior and exterior panels are fabricated with 26 gauge corrosion resistant stucco embossed coated steel. Models supplied with a floor will include a smooth aluminum interior floor surface.
- G. Insulation: Panels are four (4) inches thick, metal clad and foamed-in-place with HFO polyurethane insulation which is HFC free.

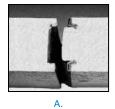

The R-values for 4" HFO panels are:

Cooler:

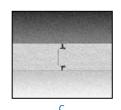

Walls/Ceilings R-value 25 Doors R-value 25

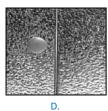

Freezer:

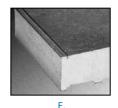

Walls/Ceilings R-value 32 Doors R-value 32 Floors R-value 28

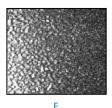

AVAILABLE SIZES

The Standard Series of QS Series walk-ins are all 6'-7" high and are all supplied with a floor. The sizes available are as follows: 4' wide x 6' long, 6' wide x 6' long, 6' wide x 10' long, 6' wide x 12' long, 8' wide x 8' long, and 8' wide x 10' long.

The 77 Series of QS Series walk-ins are all 7'-7" high and are all supplied with a floor. The sizes available are as follows: 6' wide x 6' long, 6' wide x 8' long, 6' wide x 10' long, 6' wide x 12' long, 8' wide x 8' long, and 8' wide x 10' long.

The 74 Series of QS Series walk-ins are all $7'-3^5/8"$ high and are all supplied without a floor. Wall panels are installed on top of NSF listed vinyl sealers provided. The sizes available are as follows: 6' wide x 6' long, 6' wide x 8' long, 6' wide x 10' long, 6' wide x 12' long, 8' wide x 8' long, and 8' wide x 10' long.

OUTDOOR MODELS

All QS Series walk-ins installed outdoors include a weather protection kit consisting of: One piece, 35 mill, white membrane roof material which requires no seaming or gluing to the top of the QS Series walk-in ceiling panels.

Metal trim for flashing the membrane roof material to the side of the QS Series walk-in wall panels is included.

Trim is secured to the QS Series wall panels with self-drilling and self-tapping TEK screws. In applications where the QS Series walk-in is installed next to a building, the trim can be used to secure the turned up membrane roof material to the building wall, with fasteners supplied. Door rain hoods are an option and should be included on installations where the door panels are exposed to the outdoor weather.

DOOR

Door sections are factory tested to assure proper fit, performance and alignment. All doors feature a stepped profile design that serves as a barrier to air flow which results in an energy efficient door system. Door sections are 4" thick, metal clad and foamed-in-place with EPA-compliant polyurethane insulation.

Each QS Series walk-in compartment is equipped with a 26" wide door opening. The height of the door opening varies with the series of walk-in ordered. The Standard Series (6'7" high) has a 66" high door opening and the 74 and 77 Series walk-ins have a 78" high door opening. The door is self-closing, flush mounted, infitting and constructed to incorporate heavy duty, molded ABS breaker which is permanently foamed-in-place.

Doors are available with right or left side hinges and include two field adjustable cam-lift hinges with locking set screw, top hinge spring loaded, spring actuated door closer, NL 9800 deadbolt locking handle with independent key/padlock feature and inside safety release. The doors are pre-hung in a four foot wide frame panel which is equipped with replaceable perimeter heater wire, magnetic stainless steel trim, digital thermometer, vapor proof LED light fixture and switch with exterior pilot indicator light.

The door section is completely pre-wired within concealed conduit inside the door frame panel. 120/60/1 electrical is field wired to a junction box which is surface mounted next to the interior frame above the vapor proof LED light fixture.

Hinges and door handle are mounted to 1/2" synthetic insulated tapping plates. Each door section is complete with a fiberglass reinforced plastic heated threshold.

FLOOR CONSTRUCTION

Floor panels (when supplied) are similar in construction to the wall panels except they are made to withstand uniformly distributed floor loads of up to 800 pounds per square foot. The interior floor metal is smooth aluminum.

The 74 Series, floorless models, are supplied with a patented vinyl floor sealer to stop conductivity at floor level. This unique sealer sits flat on existing floors and fits tightly against the interior/exterior wall panels. The walk-in wall panel is supported on the shoulder of the sealer so the foam edge is free of compressing weight. The vinyl floor sealer is NSF listed.

SHELVING KITS

Shelving kits specifically designed for each QS Series walk-in configuration are offered as an optional extra. These kits are shipped with the QS Series walk-in and Capsule Pak refrigeration system so that all necessary components are at your location promptly when you need them. The shelving sets are coded to correspond to the QS Series walk-in configuration ordered and are offered in either three or four tier.

SHELVING SYSTEM TYPES

A. Green Kote™ Shelving: Electrostatically applied green baked epoxy over zinc steel and brite basic wire. Thickness: 2-3 mill. 15 year guarantee against corrosion.

B. Standard Chrome Kote™ Shelving: Plated quality wire and steel. Surface nickel chrome plated.

Select the shelving finish of your choice. Shelving posts are engineered for maximum strength. Shelves are adjustable on 2" centers. All shelves are NSF listed and are zinc coated with a heavy layer of Protoxy for a maximum life span under humid storage conditions. Special clips are utilized to gain the maximum square footage of storage space for each QS Series model. 14", 18" and 24" wide shelves are used as required for maximum storage capacity in each set. This wire shelving is ideal for storage of all refrigerated or frozen products.

SHELVES

Shelves to have #9 (.148") ga. crosswires spaced 3/4" on centers with crossbraces 1/4" (.192") minimum of 4-3/4" on center.

- Shelf Frames: Channel to be 9/16" x 1" x .075" thick.
- Shelf Collars: A round tapered 1-5/16" high steel collar to be welded at each corner.

POSTS

Posts to be .062" thick 1" O.D. round tubing notched every 2" on each corner of the post.

POST LEVELERS

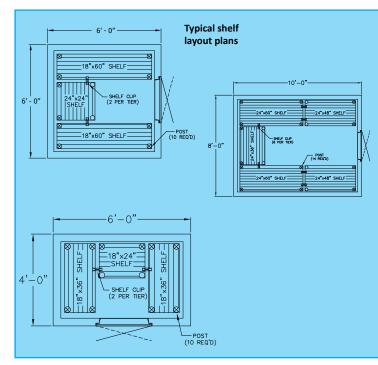

Installed on the bottom of each post is nylon housing for a steel leveler 3/8"- $16 \times 1-3/4$ ".

Floorless models are supplied with a patented vinyl floor sealer

Shelving system types include Green Kote™ and Chrome Kote™

^{*} C-UL is Underwriters Laboratories Safety Certification Mark which indicates that UL has tested the equipment to applicable CSA Standards.

CAPSULE PAK™ & CAPSULE PAK ECO™ REFRIGERATION SYSTEM SPECIFICATIONS

Capsule Pak™ and Capsule Pak ECO™ refrigeration systems consist of a single assembly pre-charged condensing unit and evaporator coil factory assembled, wired, tested and ready for insertion into a factory prepared walk-in ceiling opening.

Capsule Pak and Capsule Pak ECO systems are ceiling mount. A flush evaporator coil keeps all components outside the walk-in storage area allowing more storage inside. Capsule Pak models are available for indoor or outdoor installations while Capsule Pak ECO systems are indoor only. Models are available for interior compartment design temperatures of +35°F and -10°F. Installation is fast and easy with no plumbing required on indoor units.

The evaporator section is designed to be located entirely outside the walk-in with no intrusions into the refrigerated space. The evaporator enclosure is constructed utilizing foamed-in-place polyurethane insulation and equipped with a removable, gasketed access cover. High efficiency EC evaporator fan motors circulate air throughout the walk-in.

Indoor Capsule Pak models are equipped with either a discharge gas condensate vaporizer or an optional electric condensate vaporizer. Outdoor Capsule Pak models are equipped with low ambient controls consisting of crankcase heater and flooded condenser head pressure control. Capsule Pak ECO models incorporate a condensate pan with wicking pads and forced air from the condenser fan to evaporate condensate.

Capsule Pak and Capsule Pak ECO systems are UL and C-UL listed and DOE compliant. Note: Allow minimum of 4" clearance above and 24" on each side of the system for installation. Consideration should be given to accessibility for service and free condenser air flow. Consult factory with installation questions.

Self-contained Capsule Pak and Capsule Pak ECO systems are conveniently located on top of the walk-in to maximize interior storage space. Systems are available for single walk-in compartments.

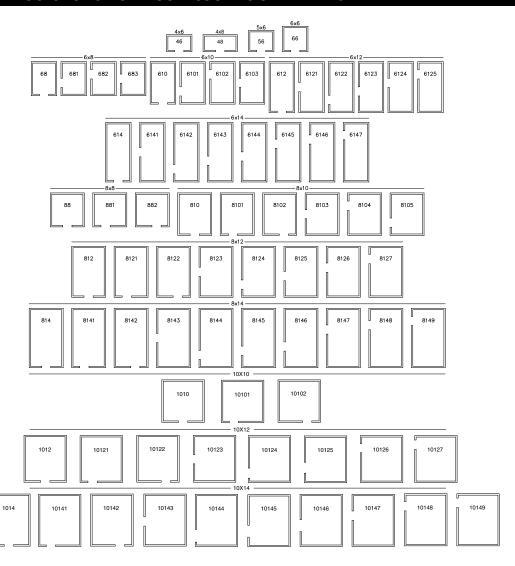

STANDARD LOGITEMP™ ELECTRONIC CONTROLLER ON ALL CAPSULE PAK™ & CAPSULE PAK ECO™ SYSTEMS

- More precise and reliable temperature control compared to all-mechanical systems
- Digital readout and four button overlay for easy setup and navigation
- Demand Defrost technology that initiates defrosts only as needed for further energy savings (Capsule Pak only)
- LogiTemp provides online data for instant notification of error codes and settings (Capsule Pak only)

^{*} Insert "S" for indoor model and "E" for outdoor

- Consideration must be given to accessibility for service & free condenser air flow. Consult factory with installation questions. Proper condensing unit ventilation must be provided. The factory recommends 200cfm of fresh air in the surrounding area with ample clearance around the condensing unit.
- +90°F ambient or less and 50% RH
- Subject to change without notice

^{*}BTUH calculated using 16 hour design runtimes on coolers and 20 hour design runtimes on freezers, 90°F ambient.

Note:

- Consult factory for application specifics, pricing and ship date availabilities.
- All Capsule Pak and Capsule Pak ECO systems require a single power supply.

9 ft. long power cord attached to condensing unit section

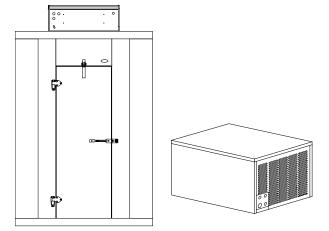

Capsule Pak Models Capsule Pak ECO Models

WALK-IN COOLERS & FREEZERS WITH SELF-CONTAINED REFRIGERATION SYSTEMS

REMOTE CAPSULE PAK™ SYSTEMS (ALL WITH R-449A REFRIGERANT)

Outdoor "E" systems include ambient controls and weather-proof hoods with quick connects for simple field connections to pre-charged line lengths of your choice.

Consult factory for application specifics, pricing, and ship date availabilities.

Optional Electric Condensate Vaporizer

Remote Capsule Pak Systems are available with an electric condensate vaporizer. This UL and C-UL approved product requires no drain lines on indoor applications, which makes installation fast and easy and allows equipment to be operational in a shorter time frame.
