

POLAR TEMP

REFRIGERATED TRANSPORTS

A SOUTHEAST COOLER CORPORATION COMPANY

Polar Temp, the innovation leader, offers a full line of refrigerated transports. Models include the 3x7, 4x8, 5x9 and the 5x10. There are two 4x8 models. One is standard with a single opening rear door. The other is super-sized, and has double opening rear doors for speedy pallet loading like the 5x9 and the 5x10.

Polar Temp's focus is on quality, backed with many years of experience. The Polar Temp line-up is tested and retested, making sure all are up to the rigors of the road and refrigerated for the harshest environments.

Quality is designed and engineered into each transport produced at Polar Temp's state of the art manufacturing facilities in Lithia Springs, Ga. All Polar Temp models feature solid steel construction with the Ceram-A-Star high performance finish, foamed in place polyurethane insulation, heavy duty truck-type hardware and weatherized 404A refrigeration units.

With five models to choose from and capacities ranging from three hundred 8 lb bags to 940 8 lb bags you are sure to find the right transport for all of your special events and delivery needs. You can purchase the Polar Temp transport with the perfectly matched trailer in your choice of colors. Other options include an electric generator for long distance, "over the road" freezing, a diamond treadbrite kick plate and trailer decking and many more options.

All Polar Temp products are engineered & manufactured to strict specifications and standards guaranteeing product safety and quality. For more information: Call: 877-984-5945 or Email: sales@polartemp.com.
