

New BK17 & 22 **Condensate Pump**

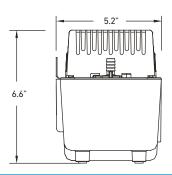

BK17 & 22 CONDENSATE PUMP

LS model does not include safety switch shown

New design offers a longer 3 year warranty life and reduced noise level. Includes lid mounted bullseye level for easy installation. Rated for condensate water up to 150° F. Automatic start/stop operation with thermally protected motor. More water pumped out per cycle means the pump runs less and lasts longer. Larger 2.5 quart tank capacity. This unit is capable of handling acidic condensation from condensing furnaces and tankless water heaters.

Average Performance

*Performance per manufacturer published data

Heat rise: The measurement of how much the motor heats up from cold start to peak hot operation temperature. Higher heat reduces motor & bearing life.

Drink: The amount of water between on/off switch level or the amount of water pumped out during each cycle. More water pumped out per cycle means the pump runs less and last longer.
