V-CORE™

COOLING TECHNOLOGY

R290

- *Environmentally friendly, natural refrigerant*
- *Zero ozone depletion and low global warming potential*
- *Small charge volumes and higher flow rates yield increased performance*

((TXV))

- *Refrigeration system adjusts flow rates to optimize performance*
- *Reduces temperature fluctuations*
- *Quicker cabinet pulldown and recovery*

VST

- *Adapts fan speed to temperature/load demand of the cabinet*
- *More efficient with reduced energy consumption*
- *More consistent product temperatures*

ADAPTIVE DEFROST

- *Initiates defrost in shorter, more frequent cycles*
- *Coil temperature sensing versus traditional time termination*
- *Clears coil of ice at initial development*
- *Defrost initiates only as required, reducing overall energy consumption*
