<sup>1</sup>Basket lifts automatically lift baskets from oil when the timer has stopped. This allows operators to produce consistent product each time and minimizes waste due to user error.

<sup>2</sup>Oil reclamation systems allow restaurant operators to remove used oil easily and safely from their kitchens. Old cooking oil is transferred to a collection tank and then taken off site by a third-party company for refinement into clean biofuels.

## POWERFRY3™ (TR SERIES) | High Performance, Low Operating Costs.

### STANDARD FEATURES:

- Patented ThreePass™ Heat Exchanger providing high energy efficiency
- Less than 750°F flue temperatures at maximum production rate
